

7. Page 27, Lines 19-23. Add clarifying language to list of elements identified for consideration of wildfire risk and hazard as follows:

“The following elements may be considered in the assessment of potential cumulative effects:

- 1.Fire hazard severity zoning **designations for land use.**
- 2.Existing and **probable** future fuel conditions including vertical and horizontal continuity **of vegetative fuels.**
- 3.Location of **known** existing **public and private** fuel breaks and fuel hazard reduction activities.
- 4.Road access for fire suppression **resources.**”
