Subject: Draft Programmatic Environmental Impact Report (DPEIR) Public Comment

California Board of Forestry and Fire Protection
Attn: Edith Hannigan, Board Analyst
Email: VegetationTreatment@bof.ca.gov

Dear Ms. Hannigan and Members of the Board,

It is with a deep sense of disappointment to find that the current Draft Programmatic Environmental Impact Report (DPEIR) for the state's proposed Vegetation Treatment Program contains many of the same errors (some with the exact wording), contradictions, and failures to identify environmental impacts that were pointed out in previous versions.

Many of the productive suggestions provided to the Board of Forestry on how they could improve the draft DPEIR were ignored, including those from the California Legislature's required review by the California Fire Science Consortium, the Department of Fish and Wildlife, fire scientists, and environmental groups.

Potential impacts are dismissed by the DPEIR without support, mitigations of impacts are unenforceable and unmeasurable, the treatment of northern chaparral is justified by non sequitur reasoning, and the research of several scientists continues to be misrepresented (despite corrections being submitted). The lack of transparency remains a significant issue – using a local newspaper to inform the public about projects is no longer adequate.

The current DPEIR fails to meet the requirements of the California Environmental Quality Act (CEQA).
