SRA FIRE SAFE REGULATIONS, 2020

14 CCR, Division 1.5, Chapter 7 Fire Protection, Subchapter 2, Articles 1-5.

SRA Fire Safe Regulations

1270.00 Title
These regulations shall be known as the “SRA Fire Safe Regulations,” and shall constitute the basic wildfire protection standards of the California Board of Forestry and Fire Protection.

Note: Authority cited: Section 4290, Public Resources Code.
Reference: Sections 4102, 4126, 4127 and 4290, Public Resources Code.

1270.01 Purpose
(a) These regulations have been prepared and adopted for the purpose of establishing minimum wildfire protection standards in conjunction with building, construction and development in the State Responsibility Area (SRA).

(b) A local jurisdiction may petition the Board for certification pursuant to section 1270.03. Where Board certification has not been granted, these regulations shall become effective September 1, 1991. The future design and construction of structures, subdivisions and developments in the State Responsibility Area (SRA) shall provide for basic
emergency access and perimeter wildfire protection measures as specified in the following articles.

(c) These measures shall provide for emergency access; signing and building numbering; private water supply reserves for emergency fire use; and vegetation modification. The fire protection standards which follow shall specify the minimums for such measures.

Note: Authority cited: Section 4290, Public Resources Code.

1270.02 Scope

(a) These regulations shall apply to:

(1) the perimeters and access to all residential, commercial, and industrial building construction within the SRA approved after January 1, 1991 except as set forth below in subsection b.);

(2) the siting of newly installed commercial modulars, manufactured homes, mobilehomes, and factory-built housing, as defined in Health and Safety Code sections 18001.8, 18007, 18008, and 19971;

(23) all tentative and parcel maps or other developments approved after January 1, 1991; and

(43) applications for building permits on a parcel approved in a pre-1991 parcel or tentative map to the extent that conditions
relating to the perimeters and access to the buildings were not imposed as part of the approval of the parcel or tentative map.

(b) These regulations do not apply where an application for a building permit is filed after January 1, 1991 for building construction on a parcel that was formed from a parcel map or tentative map (if the final map for the tentative map is approved within the time prescribed by the local ordinance) approved prior to January 1, 1991, to the extent that conditions relating to the perimeters and access to the buildings were imposed by the parcel map or final tentative map approved prior to January 1, 1991.

(c) Affected activities include, but are not limited to:

(1) permitting or approval of new parcels, excluding lot line adjustments as specified in Government Code (GC) section 66412(d);

(2) application for a building permit for new construction, not relating to an existing structure;

(3) application for a use permit;

(54) road construction, including construction of a road that
does not currently exist, or extension of an existing road.
(d) EXEMPTION: Roads used solely for agricultural, or mining,
use and or roads used solely for the management and harvesting
of wood products.
Note: Authority cited: Section 4290, Public Resources Code.

1270.03 Local Ordinances Provisions for Application of These
Regulations
This subchapter shall be applied as follows:
(a) the local jurisdictions shall provide the Director of the
California Department of Forestry and Fire Protection (CAL FIRE)
or their designee with notice of applications for building
permits, tentative parcel maps, tentative maps, and installation
or use permits for construction or development within the SRA.
(b) the Director or their designee may review and make fire
protection recommendations on applicable construction or
development permits or maps provided by the local jurisdiction.
(c) the local jurisdiction shall ensure that the applicable
sections of this subchapter become a condition of approval of
any applicable construction or development permit or map.
Nothing contained in these regulations shall be considered as
abrogating the provisions of any ordinance, rule or regulation
of any state or local jurisdiction providing such ordinance,
rule, regulation or general plan element is equal to or more stringent than these minimum standards. The Board may certify local ordinances as equaling or exceeding these regulations when they provide the same practical effect. The Board's certification of local ordinances pursuant to this section is rendered invalid when previously certified ordinances are subsequently amended by local jurisdictions without Board re-certification of the amended ordinances. The Board's regulations supersede the amended local ordinance(s) when the amended local ordinance(s) are not re-certified by the Board. Amendments made by local jurisdictions to previously certified ordinances shall be re-certified as described in 14 CCR §§ 1270.01 and 1270.03.

1270.04 Provisions for Application of These Regulations

Local Ordinances

(a) Nothing contained in these regulations shall be considered as abrogating the provisions of any ordinance, rule or regulation of any state or local jurisdiction providing such ordinance, rule, regulation or general plan element is equal to or more stringent than these minimum standards.
(b) The Board may certify local ordinances as equaling or exceeding these regulations when they provide the same practical effect.

(c) Counties may submit their local ordinances for certification via email to the Board.

(d) The Board's certification of local ordinances pursuant to this section is rendered invalid when previously certified ordinances are subsequently amended by local jurisdictions without Board re-certification of the amended ordinances. The Board's regulations supersede the amended local ordinance(s) when the amended local ordinance(s) are not re-certified by the Board. Amendments made by local jurisdictions to previously certified ordinances shall be submitted for re-certification.

This subchapter shall be applied as follows:

(a) local jurisdictions shall provide the Director with notice of applications for building permits, tentative parcel maps, tentative maps, and use permits for construction or development within SRA.

(b) the Director may review and make fire protection recommendations on applicable construction or development permits or maps provided by the local jurisdiction.

(c) the local jurisdiction shall ensure that the applicable sections of this subchapter become a condition of approval of any applicable construction or development permit or map.

1270.05 Inspections Authority

Inspections shall conform to the following requirements:

(a) Inspection shall be made pursuant to section 1270.06 by:

(1) the Director, or

(2) local jurisdictions that have assumed state fire protection responsibility on SRA lands, or

(3) local jurisdictions where these regulations have been incorporated verbatim into that jurisdiction's building permit or subdivision approval process and the inspection duties have been formally delegated by CAL FIRE to the local jurisdiction.

or

(4) local jurisdictions where the local ordinances have been certified pursuant to 14 CCR §§ 1270.01 and 1270.03 and the inspection duties have been formally delegated by CAL FIRE to the local jurisdiction.

(b) Inspections made under 14 CCR § 1270.05(a)(2) or 14 CCR § 1270.05(a)(3) shall occur only when these regulations are incorporated into local ordinance in one of the following manners:
(1) these regulations have been incorporated verbatim or by reference into that jurisdiction’s permitting or approval process for the activities described in 14 CCR § 1270.02; or

(2) the local ordinances have been certified pursuant to 14 CCR § 1270.04.

(b) Nothing in this section abrogates CAL FIRE's authority to inspect and enforce state forest and fire laws even when the inspection duties have been delegated pursuant to this section.

(c) Reports of violations shall be provided to the CAL FIRE Unit headquarters that administers SRA fire protection in the local jurisdiction.

(e) When inspections are conducted, they shall occur prior to:

the issuance of the use permit; certificate of occupancy; the recording of the parcel map or final map; the filing of a notice of completion; or the final inspection of any project or building permit.

1270.06 Inspections Exceptions to Standards

(a) Upon request by the applicant, exceptions to standards within this subchapter or to local jurisdiction certified ordinances may be allowed by the inspection entity listed in 14 CCR § 1270.05, where the exceptions provide the same overall practical effect as these regulations towards providing
defensible space. Exceptions granted by the inspection entity listed in 14 CCR § 1270.05 shall be made on a case-by-case basis only. Exceptions granted by the inspection entity listed in 14 CCR § 1270.05 shall be forwarded to the appropriate CAL FIRE Unit Office that administers SRA fire protection in that county and shall be retained on file at the Unit Office.

(b) Requests for an exception shall be made in writing to the inspection entity listed in 14 CCR § 1270.05 by the applicant or the applicant's authorized representative. At a minimum, the request shall state the specific section(s) for which an exception is requested, material facts supporting the contention of the applicant, the details of the exception proposed, and a map showing the proposed location and siting of the exception. Jurisdictions may establish additional procedures or requirements for exception requests.

(c) Where an exception is not granted by the inspection entity, the applicant may appeal such denial to the local jurisdiction. The local jurisdiction may establish or utilize an appeal process consistent with existing local building or planning department appeal processes.

(d) Before the local jurisdiction makes a determination on an appeal, the inspection authority shall be consulted and shall provide to that local jurisdiction documentation outlining the effects of the requested exception on wildfire protection.
(e) If an appeal is granted, the local jurisdiction shall make findings that the decision meets the intent of providing defensible space consistent with these regulations. Such findings shall include a statement of reasons for the decision. A written copy of these findings shall be provided to the CAL FIRE Unit headquarters that administers SRA fire protection in that local jurisdiction. The inspection entity listed in 14 CCR 1270.05 may inspect for compliance with these regulations. When inspections are conducted, they should occur prior to: the issuance of the use permit; certificate of occupancy; the recordation of the parcel map or final map; the filing of a notice of completion; or the final inspection of any project or building permit.

Note: Authority cited: Section 4290, Public Resources Code.

1270.07. Exceptions to Standards.
Upon request by the applicant, exceptions to standards within this subchapter or local jurisdiction certified ordinances may be allowed by the inspection entity listed in 14 CCR 1270.05, where the exceptions provide the same overall practical effect as these regulations towards providing defensible space. Exceptions granted by the inspection entity listed in 14 CCR 1270.05 shall be made on a case-by-case basis only. Exceptions granted by the inspection entity listed in 14 CCR 1270.05 shall
be forwarded to the appropriate CAL FIRE Unit Office that administers SRA fire protection in that county and shall be retained on file at the Unit Office.

Note: Authority cited: Section 4290, Public Resources Code.

1270.08 Requests for Exceptions

Requests for an exception shall be made in writing to the inspection entity listed in 14 CCR 1270.05 by the applicant or the applicant's authorized representative. The request shall state the specific section(s) for which an exception is requested, material facts supporting the contention of the applicant, the details of the exception proposed, and a map showing the proposed location and siting of the exception.

Note: Authority cited: Section 4290, Public Resources Code.

1270.09 Appeals

Where an exception is not granted by the inspection entity, the applicant may appeal such denial to the local jurisdiction. The local jurisdiction may establish or utilize an appeal process consistent with existing local building or planning department appeal processes.

Before the local jurisdiction makes a determination on an appeal, the inspection authority shall be consulted and shall
provide to that local jurisdiction documentation outlining the
effects of the requested exception on wildland fire protection.
If an appeal is granted, the local jurisdiction shall make
findings that the decision meets the intent of providing
defensible space consistent with these regulations. Such
findings shall include a statement of reasons for the decision.
A written copy of these findings shall be provided to the CAL
FIRE Unit headquarters that administers SRA fire protection in
that local jurisdiction.
Note: Authority cited: Section 4290, Public Resources Code.

1271.00 Definitions
Accessory building: Any building used as an accessory to
residential, commercial, recreational, industrial, or
educational purposes as defined in the California Building Code,
1989 Amendments, chapter 11, group M, division 1, Occupancy that
requires a building permit.
Agriculture: Land used for agricultural purposes as defined in a
local jurisdiction's zoning ordinances.
Building: Any structure used or intended for supporting or
sheltering any use or occupancy, except Utility and
Miscellaneous Group U structures. that is defined in the
California Building Code, 1989 Amendments, chapter 11, except
group M, division 1, Occupancy. For the purposes of this
subchapter, building includes mobile homes and manufactured homes, churches, and day care facilities.

CDFCAL FIRE: California Department of Forestry and Fire Protection.

Dead-end road: A road that has only one point of vehicular ingress/egress, including cul-de-sacs and looped roads.

Defensible space: The area within the perimeter of a parcel, development, neighborhood or community where basic wildland fire protection practices and measures are implemented, providing the key point of defense from an approaching wildfire or defense against encroaching wildfires or escaping structure fires. The perimeter as used in this regulation is the area encompassing the parcel or parcels proposed for construction and/or development, excluding the physical structure itself. The area is characterized by the establishment and maintenance of emergency vehicle access, emergency water reserves, street road names and building identification, and fuel modification measures.

Development: As defined in section 66418.1 of the California Government Code.

Director: Director of the Department of Forestry and Fire Protection or his/her their designee.

Driveway: A vehicular access that serves up to two (2) parcels with no more than two (2) residential units and any number of non-commercial or industrial buildings on each parcel.
than two buildings, with no more than 3 dwelling units on a
single parcel, and any number of accessory buildings.

Distance Measurements: All specified or referenced distances are
measured along the ground, unless otherwise stated.

Dwelling unit: Any building or portion thereof which contains
living facilities, including provisions for sleeping, eating,
cooking and/or sanitation for not more than one family.

Exception: An alternative to the specified standard requested by
the applicant that may be necessary due to health, safety,
environmental conditions, physical site limitations or other
limiting conditions, such as recorded historical sites, that
provides mitigation of the problem.

Fire valve: see hydrant.

Fuel modification area: An area where the volume of flammable
vegetation has been reduced, providing reduced fire intensity
and duration.

Greenbelts: A facility or land-use, designed for a use other
than fire protection, which will slow or resist the spread of a
wildfire. Includes parking lots, irrigated or landscaped areas,
golf courses, parks, playgrounds, maintained vineyards, orchards
or annual crops that do not cure in the field.

Hammerhead/T: A roadway or driveway that provides a “T” shaped,
three-point turnaround space for emergency equipment, being no
narrower than the road that serves it.
Hydrant: A valved connection on a water supply or storage system, having at least either one two and a half (2 ½) inch or one four and a half (4 ½) inch outlet, with male American National Fire Hose Screw Threads (NH), used to supply fire apparatus and hoses with water.

Local Jurisdiction: Any county, city/county agency or department, or any locally authorized district that issues or approves building permits, use permits, tentative maps or tentative parcel maps, or has authority to regulate development and construction activity.

Occupancy: The purpose for which a building, or part thereof, is used or intended to be used.

One-way road: A minimum of one traffic lane width designed for traffic flow in one direction only.

Residential unit: Any building or portion thereof which contains living facilities, including provisions for sleeping, eating, cooking and/or sanitation for one or more persons not more than one family. Manufactured homes, mobilehomes, and factory-built housing are considered residential units for the purposes of mandatory measures required in 14 CCR § 1270.01(c).

Roads: streets, private lanes: Vehicular access to more than two (2) parcels; more than four (4) residential units; or access to any industrial or commercial occupancy. Includes public and private streets and lanes. one parcel; access to any industrial
or commercial occupancy; or vehicular access to a single parcel with more than two buildings or four or more dwelling units.

Roadway: Any surface designed, improved, or ordinarily used for vehicle travel.

Roadway or driveway structures: Bridges, culverts, and other appurtenant structures which supplement the traffic lane roadway bed or shoulders.

Same Practical Effect: As used in this subchapter, means an exception or alternative with the capability of applying accepted wildland fire suppression strategies and tactics, and provisions for fire fighter safety, including:

(a) access for emergency wildland fire equipment,
(b) safe civilian evacuation,
(c) signing that avoids delays in emergency equipment response,
(d) available and accessible water to effectively attack wildfire or defend a structure from wildfire, and
(e) fuel modification sufficient for civilian and fire fighter safety.

Shoulder: Roadbed or surface Vehicular access adjacent to the traffic lane.

State Board of Forestry and Fire Protection (BoardSBOF): As defined in Public Resources Code section 730. A nine member board, appointed by the Governor, which is responsible for developing the general forest policy of the state, for determining the guidance policies of the Department of Forestry...
and Fire Protection, and for representing the state's interest in federal land in California.

State Responsibility Area (SRA): As defined in Public Resources Code sections 4126-4127; and the California Code of Regulations, title 14, division 1.5, chapter 7, article 1, sections 1220-1220.5.

Structure: That which is built or constructed, an edifice or building of any kind, or any piece of work artificially built up or composed of parts joined together in some definite manner.

Subdivision: As defined in section 66424 of the Government Code.

Traffic lane: The portion of a roadway or driveway that provides a single line of vehicle travel.

Turnaround: A roadway or driveway, unobstructed by parking, which allows for a safe opposite change of direction for emergency equipment. Design of such area may be a hammerhead/T or terminus bulb.

Turnouts: A widening in a roadway or driveway to allow vehicles to pass.

Utility and Miscellaneous Group U building: A structure of an accessory character or a miscellaneous structure not classified in any specific occupancy permitted, constructed, equipped, and maintained to conform to the requirements of Title 24, California Building Standards Code.

Vertical clearance: The minimum specified height of a bridge or overhead projection above the roadway or driveway.
Wildfire: As defined in Public Resources Code Section 4103 and 4104.
Note: Authority cited: Section 4290, Public Resources Code.

1271.05 Distance Measurements
All specified or referenced distances are measured along the ground, unless otherwise stated.
Note: Authority cited: Section 4290, Public Resources Code.

1272.00 Maintenance of Defensible Space Measures
To ensure continued maintenance of properties in conformance with these standards and measures and to assure continued availability, access, and utilization of the defensible space provided for in these standards during a wildfire, provisions for annual maintenance shall be included in the development plans and/or shall be provided as a condition of the permit, parcel or map approval.
Note: Authority cited: Section 4290, Public Resources Code.

1273.00 Intent
Roads and driveways, and street networks, whether public or private, unless exempted under section 14 CCR § 1270.02(e).
shall provide for safe access for emergency wildfire land fire
equipment and civilian evacuation concurrently, and shall
provide unobstructed traffic circulation during a wildfire
emergency consistent with sections 14 CCR §§ 1273.00 through
1273.0911.

Note: Authority cited: Section 4290, Public Resources Code.

1273.01 Road Width

(a) All roads shall be constructed to provide a minimum of two
ten (10) foot traffic lanes, not including shoulder and
striping. These traffic lanes shall provide for two-way traffic
flow to support emergency vehicle and civilian egress, unless
other standards are provided in this article or additional
requirements are mandated by local jurisdictions or local
subdivision requirements. Vertical clearances shall conform to
the requirements in California Vehicle Code section 35250.

(b) All one-way roads shall be constructed to provide a minimum
of one twelve (12) foot traffic lane, not including shoulders.
The local jurisdiction may approve one-way roads.

(1) All one-way roads shall connect to a road with two traffic
lanes providing for travel in different directions at both ends,
and shall provide access to an area currently zoned for no more
than ten (10) residential units.
(2) In no case shall a one-way road exceed 2,640 feet in length. A turnout shall be placed and constructed at approximately the midpoint of each one-way road.

(c) All driveways shall be constructed to provide a minimum of one (1) ten (10) foot traffic lane, fourteen (14) feet unobstructed horizontal clearance, and unobstructed vertical clearance of thirteen feet, six inches (13’6”).

1273.02 Roadway Surfaces
(a) Roads shall be designed and maintained to support the imposed load of fire apparatus weighing at least 75,000 pounds and provide an aggregate base.
(b) Driveways and road and driveway structures shall be designed and maintained to support at least 40,000 pounds.
(c) Project proponent shall provide engineering specifications to support design, if requested by the local authority having jurisdiction.

1273.03 Roadway Grades
(a) At no point shall the grade for all roads, streets, private lanes and driveways shall not exceed 16 percent.
(b) The grade may exceed 16%, not to exceed 20%, with approval from the authority having jurisdiction and with mitigations to provide for same practical effect.

Note: Authority cited: Section 4290, Public Resources Code.

1273.04 Roadway Radius

(a) No road or road structure roadway shall have a horizontal inside radius of curvature of less than fifty (50) feet. An and additional surface width of four (4) feet shall be added to curves of 50-100 feet radius; two (2) feet to those from 100-200 feet.

(b) The length of vertical curves in roadways, exclusive of gutters, ditches, and drainage structures designed to hold or divert water, shall be not less than one hundred (100) feet.

Note: Authority cited: Section 4290, Public Resources Code.

1273.05 Roadway Turnarounds

(a) Turnarounds are required on driveways and dead-end roads.

(b) The minimum turning radius for a turnaround shall be forty (40) feet, not including parking, in accordance with the following figures in 14 CCR §§ 1273.05(e) and 1273.05(f). If a hammerhead/T is used instead, the top of the “T” shall be a minimum of sixty (60) feet in length.
(c) Driveways exceeding 150 feet in length, but less than 800 feet in length, shall provide a turnout near the midpoint of the driveway. Where the driveway exceeds 800 feet, turnouts shall be provided no more than 400 feet apart.

(d) A turnaround shall be provided on driveways over 300 feet in length and shall be within fifty (50) feet of the building.

(d) Each dead-end road shall have a turnaround constructed at its terminus. Where parcels are zoned five (5) acres or larger, turnarounds shall be provided at a maximum of 1,320 foot intervals.

(e) Figure A. Turnarounds on roads with two ten-foot traffic lanes.
(f) Figure B. Turnarounds on driveways with one ten-foot traffic lane.
1274.06 Roadway Turnouts

Turnouts shall be a minimum of twelve (12) feet wide and thirty (30) feet long with a minimum twenty-five (25) foot taper on each end.

Note: Authority cited: Section 4290, Public Resources Code.
(a) All driveway, road, street, and private lane roadway structures shall be constructed to carry at least the maximum load and provide the minimum vertical clearance as required by Vehicle Code Sections 35250, 35550, and 35750.

(b) Appropriate signing, including but not limited to weight or vertical clearance limitations, one-way road or single traffic lane conditions, shall reflect the capability of each bridge.

(c) Where a bridge or an elevated surface is part of a fire apparatus access road, the bridge shall be constructed and maintained in accordance with the American Association of State and Highway Transportation Officials Standard Specifications for Highway Bridges, 17th Edition, published 2002 (known as AASHTO HB-17), hereby incorporated by reference. Bridges and elevated surfaces shall be designed for a live load sufficient to carry the imposed loads of fire apparatus. Vehicle load limits shall be posted at both entrances to bridges when required by the local authority having jurisdiction.

(c) Where elevated surfaces designed for emergency vehicle use are adjacent to surfaces which are not designed for such use, barriers—, or signs, or both, as approved by the local authority having jurisdiction, shall be installed and maintained.

(d) A bridge with only one traffic lane may be authorized by the local jurisdiction; however, it shall provide for unobstructed visibility from one end to the other and turnouts at both ends.
1273.08 One-Way Roads - Dead-end Roads

(a) The maximum length of a dead-end road, including all dead-end roads accessed from that dead-end road, shall not exceed the following cumulative lengths, regardless of the number of parcels served:

- parcels zoned for less than one acre - 800 feet
- parcels zoned for 1 acre to 4.99 acres - 1,320 feet
- parcels zoned for 5 acres to 19.99 acres - 2,640 feet
- parcels zoned for 20 acres or larger - 5,280 feet

All lengths shall be measured from the edge of the roadway surface at the intersection that begins the road to the end of the road surface at its farthest point. Where a dead-end road crosses areas of differing zoned parcel sizes requiring different length limits, the shortest allowable length shall apply.

(b) See 14 CCR § 1273.05 for dead-end road turnaround requirements.

All one-way roads shall be constructed to provide a minimum, not including shoulders, of one twelve (12) foot traffic lane. The local jurisdiction may approve one-way roads. All one-way roads shall connect to a two-lane roadway at both ends, and shall provide access to an area currently zoned for no more than ten...
(10) dwelling units. In no case shall it exceed 2,640 feet in
length. A turnout shall be placed and constructed at
approximately the midpoint of each one-way road.

Note: Authority cited: Section 4290, Public Resources Code.

1273.09 Dead-end Roads—Gate Entrances

(a) Gate entrances shall be at least two (2) feet wider than the
width of the traffic lane(s) serving that gate and a minimum
width of fourteen (14) feet unobstructed horizontal clearance
and unobstructed vertical clearance of thirteen feet, six inches
(13’6”).

(b) All gates providing access from a road to a driveway shall
be located at least thirty (30) feet from the roadway and shall
open to allow a vehicle to stop without obstructing traffic on
that road.

(c) Where a one-way road with a single traffic lane provides
access to a gated entrance, a forty (40) foot turning radius
shall be used.

(d) Security gates shall not be installed without approval and
where security gates are installed, they shall have an approved
means of emergency operation. Approval shall be by the local
authority having jurisdiction. The security gates and the
emergency operation shall be maintained operational at all
times.
(a) The maximum length of a dead-end road, including all dead-
end roads accessed from that dead-end road, shall not exceed the
following cumulative lengths, regardless of the number of
parcels served:
parcels zoned for less than one acre - 800 feet
parcels zoned for 1 acre to 4.99 acres - 1320 feet
parcels zoned for 5 acres to 19.99 acres - 2640 feet
parcels zoned for 20 acres or larger - 5280 feet
All lengths shall be measured from the edge of the roadway
surface at the intersection that begins the road to the end of
the road surface at its farthest point. Where a dead-end road
crosses areas of differing zoned parcel sizes, requiring
different length limits, the shortest allowable length shall
apply.
(b) Where parcels are zoned 5 acres or larger, turnarounds shall
be provided at a maximum of 1320 foot intervals.
(c) Each dead-end road shall have a turnaround constructed at
its terminus.
Note: Authority cited: Section 4290, Public Resources Code.

1273.10 Driveways
(a) All driveways shall be constructed to provide a minimum of
one (1) ten (10) foot traffic lane and fourteen (14) feet
unobstructed horizontal clearance and unobstructed vertical
clearance of fifteen (15) feet.

(b) Driveways exceeding 150 feet in length, but less than 800
feet in length, shall provide a turnout near the midpoint of the
driveway. Where the driveway exceeds 800 feet, turnouts shall be
provided no more than 400 feet apart.

(c) A turnaround shall be provided to all building sites on
driveways over 300 feet in length, and shall be within fifty
(50) feet of the building.

Note: Authority cited: Section 4290, Public Resources Code.

1273.11 Gate Entrances

(a) Gate entrances shall be at least two (2) feet wider than the
width of the traffic lane(s) serving that gate and a minimum
width of fourteen (14) feet unobstructed horizontal clearance
and unobstructed vertical clearance of fifteen (15) feet.

(b) All gates providing access from a road to a driveway shall
be located at least thirty (30) feet from the roadway and shall
open to allow a vehicle to stop without obstructing traffic on
that road.

(c) Security gates shall not be installed without approval and
where security gates are installed, they shall have an approved
means of emergency operation. Approval shall be by the local
authority having jurisdiction. The security gates and the
emergency operation shall be maintained operational at all times.

(d) Where a one-way road with a single traffic lane provides access to a gated entrance, a forty (40) foot turning radius shall be used.

1274.00 Intent

To facilitate locating a fire and to avoid delays in response, all newly constructed or approved roads, street, and buildings shall be designated by names or numbers, posted on signs clearly visible and legible from the roadway. This section shall not restrict the size of letters or numbers appearing on road street signs for other purposes.

1274.01. Size of Letters, Numbers and Symbols for Street and Road Signs.

(a) Newly constructed or approved roads must be identified by a name or number through a consistent system that provides for sequenced or patterned numbering and/or non-duplicative naming within each local jurisdiction. This section does not require any entity to rename or renumber existing roads, nor shall a
road providing access only to a single commercial or industrial
occupancy require naming or numbering.
(b) The size of letters, numbers—, and symbols for street and
road signs shall be a minimum four (4) inch letter height, half
inch (.5) inch stroke, reflectorized, contrasting with the
background color of the sign.
Note: Authority cited: Section 4290, Public Resources Code.

1274.02. Road Sign Installation, Location, and Visibility
Visibility and Legibility of Street and Road Signs.
(a) Street and road signs shall be visible and legible from
both directions of vehicle travel for a distance of at least one
hundred (100) feet.
(b) Signs required by this article identifying intersecting
roads shall be placed at the intersection of those roads.
(c) A sign identifying traffic access or flow limitations,
including but not limited to weight or vertical clearance
limitations, dead-end roads, one-way roads, or single lane
conditions, shall be placed:
(i) at the intersection preceding the traffic access limitation,
and
(ii) no more than one hundred (100) feet before such traffic
access limitation.
(d) Road signs required by this article shall be posted at the beginning of construction and shall be maintained thereafter. Note: Authority cited: Section 4290, Public Resources Code.

1274.03. Height of Street and Road Signs. Addresses for Buildings.
(a) All buildings shall be issued an address by the local jurisdiction which conforms to that jurisdiction's overall address system. Utility and miscellaneous Group U buildings are not required to have a separate address; however, each residential unit within a building shall be separately identified.
(b) The size of letters, numbers, and symbols for addresses shall conform to the standards in the California Fire Code, California Code of Regulations title 24, part 9.
(c) Addresses for residential buildings shall be reflectorized. Height of street and road signs shall be uniform county wide, and meet the visibility and legibility standards of this article. Note: Authority cited: Section 4290, Public Resources Code.

1274.04. Names and Numbers on Street and Road Signs. Address Installation, Location, and Visibility.
(a) All buildings shall have a permanently posted address which shall be plainly legible and visible from the road fronting the property.

(b) Where access is by means of a private road and the address identification cannot be viewed from the public way, an unobstructed sign or other means shall be used so that the address is visible from the public way.

(c) Address signs along one-way roads shall be visible from both directions.

(d) Where multiple addresses are required at a single driveway, they shall be mounted on a single sign or post.

(e) Where a road provides access solely to a single commercial or industrial business, the address sign shall be placed at the nearest road intersection providing access to that site, or otherwise posted to provide for unobstructed visibility from that intersection.

(f) In all cases, the address shall be posted at the beginning of construction and shall be maintained thereafter.

Newly constructed or approved public and private roads and streets must be identified by a name or number through a consistent countywide system that provides for sequenced or patterned numbering and/or non-duplicating naming within each county. All signs shall be mounted and oriented in a uniform manner. This section does not require any entity to rename or renumber existing roads or streets, nor shall a roadway
providing access only to a single commercial or industrial occupancy require naming or numbering.

Note: Authority cited: Section 4290, Public Resources Code.

1274.05. Intersecting Roads, Streets and Private Lanes.
Signs required by this article identifying intersecting roads, streets and private lanes shall be placed at the intersection of those roads, streets, and/or private lanes.

Note: Authority cited: Section 4290, Public Resources Code.

1274.06. Signs Identifying Traffic Access Limitations.
A sign identifying traffic access or flow limitations, including but not limited to weight or vertical clearance limitations, dead-end road, one-way road or single lane conditions, shall be placed:
(a) at the intersection preceding the traffic access limitation,
and
(b) no more than 100 feet before such traffic access limitation.

Note: Authority cited: Section 4290, Public Resources Code.

1274.07. Installation of Road, Street and Private Lane Signs.
Road, street and private lane signs required by this article shall be installed prior to final acceptance by the local jurisdiction of road improvements.

Note: Authority cited: Section 4290, Public Resources Code.

1274.08. Addresses for Buildings.
All buildings shall be issued an address by the local jurisdiction which conforms to that jurisdiction's overall address system. Accessory buildings will not be required to have a separate address; however, each dwelling unit within a building shall be separately identified.

Note: Authority cited: Section 4290, Public Resources Code.

1274.09. Size of Letters, Numbers and Symbols for Addresses.
Size of letters, numbers and symbols for addresses shall be a minimum 4 inch letter height, .5 inch stroke, reflectorized, contrasting with the background color of the sign. Address identification shall be plainly legible and visible from the street or road fronting the property. Addresses shall be Arabic numbers or alphabetical letters.

Where access is by means of a private road and the address identification cannot be viewed from the public way, a monument,
pole or other sign or means shall be used to identify the address.

Note: Authority cited: Section 4290, Public Resources Code.

1274.10. Installation, Location and Visibility of Addresses.
(a) All buildings shall have a permanently posted address, which shall be placed at each driveway entrance and visible from both directions of travel along the road. In all cases, the address shall be posted at the beginning of construction and shall be maintained thereafter, and the address shall be visible and legible from the road on which the address is located.
(b) Address signs along one-way roads shall be visible from both the intended direction of travel and the opposite direction.
(c) Where multiple addresses are required at a single driveway, they shall be mounted on a single post.
(d) Where a roadway provides access solely to a single commercial or industrial business, the address sign shall be placed at the nearest road intersection providing access to that site.

Note: Authority cited: Section 4290, Public Resources Code.

1275.00. Intent.
Emergency water for wildfire protection shall be available, accessible, and maintained in quantities and locations specified in the statute and these regulations in order to attack a wildfire or defend property from a wildfire.

Note: Authority cited: Section 4290, Public Resources Code.

1275.01. Application.
The provisions of this article shall apply in the tentative and parcel map process when new parcels are approved by the local jurisdiction having authority. When a water supply for structure defense is required to be installed, such protection shall be installed and made serviceable prior to and during the time of construction except when alternative methods of protection are provided and approved by the local authority having jurisdiction.

Note: Authority cited: Section 4290, Public Resources Code.

(a) When a water supply for structure defense is required to be installed, such protection shall be installed and made serviceable prior to and during the time of construction except when alternative methods of protection are provided and approved by the local authority having jurisdiction. Water systems that
comply with the below standard or standards meet or exceed the intent of these regulations.

(b) Water systems equaling or exceeding the California Fire Code, California Code of Regulations title 24, part 9, or, where a municipal-type water supply is unavailable, National Fire Protection Association (NFPA) 1142, “Standard on Water Supplies for Suburban and Rural Fire Fighting,” 2012 2017 Edition, hereby incorporated by reference, and California Fire Code, California Code of Regulations title 24, part 9, shall be accepted as meeting the requirements of this article.

(c) Such emergency water may be provided in a fire agency mobile water tender, or naturally occurring or man made containment structure, as long as the specified quantity is immediately available.

(d) Nothing in this article prohibits the combined storage of emergency wildfire and structural firefighting water supplies unless so prohibited by local ordinance or specified by the local fire agency.

(e) Where freeze or crash protection is required by local jurisdictions having authority, such protection measures shall be provided.

Note: Authority cited: Section 4290, Public Resources Code.

1275.0315. Hydrants and Fire Valves.
(a) The hydrant or fire valve shall be eighteen (18) inches above the finished surface. Its location in relation to the road or driveway and to the building(s) or structure(s) it serves shall comply with California Fire Code, California Code of Regulations title 24, part 9, Chapter 5, and Appendix C. eight (8) feet from flammable vegetation, no closer than four (4) feet nor farther than twelve (12) feet from a roadway, and in a location where fire apparatus using it will not block the roadway.

The hydrant serving any building shall:

1. be not less than fifty (50) feet nor more than 1/2 mile by road from the building it is to serve, and
2. be located at a turnout or turnaround, along the driveway to that building or along the road that intersects with that driveway.

(b) The hydrant head shall be a two and half (2 ½) inch National Hose male thread with cap for pressure and gravity flow systems and four and a half (4 ½) inch for draft systems.

(c) Such hydrants shall be wet or dry barrel and have suitable freeze or crash protection as required by the local jurisdiction. They shall have suitable crash protection as required by the local jurisdiction.

1275.0420. Signing of Water Sources.

(a) Each hydrant, fire valve, or access to water shall be identified as follows:

(a1) if located along a driveway, a reflectorized blue marker, with a minimum dimension of three (3) inches shall be located on the driveway address sign and mounted on a fire retardant post, or

(b2) if located along a street or road,

(1i) a reflectorized blue marker, with a minimum dimension of three (3) inches, shall be mounted on a fire retardant post. The sign post shall be three (3) feet of said hydrant or fire valve, with the sign no less than three (3) feet nor greater than five (5) feet above ground, in a horizontal position and visible from the driveway, or

Note: Authority cited: Section 4290, Public Resources Code.

1276.00. Intent.

To reduce the intensity of a wildfire by reducing the volume and density of flammable vegetation, the strategic siting of fuel modification and greenbelts shall provide increased safety for emergency fire equipment and evacuating civilians by
its utilization around structures and roads, including driveways; and (2) a point of attack or defense from a wildfire. Note: Authority cited: Section 4290, Public Resources Code. Reference: Sections 4290 and 4291, Public Resources Code.

1276.01. Setback for Structure Defensible Space.

(a) All parcels 1 acre and larger shall provide a minimum thirty (30) foot setback for all buildings and accessory buildings from all property lines and/or the center of a road.

(b) When a thirty (30) foot setback is not possible for practical reasons, which may include but are not limited to parcel dimensions or size, topographic limitations, or other easements, the local jurisdiction shall provide for same practical effect.

(i) Same practical effect requirements shall reduce the likelihood of home-to-home ignition.

(ii) Same practical effect options may include, but are not limited to, noncombustible block walls or fences; five (5) feet of noncombustible material horizontally around the structure; installing hardscape landscaping or reducing exposed windows on the side of the structure with a less than thirty (30) foot setback; or additional structure hardening such as those required in the California Building Code, California Code of Regulations title 24, part 2, Chapter 7A.
For parcels less than 1 acre, local jurisdictions shall provide for the same practical effect.

(c) Structures constructed in the SRA are required to comply with the defensible space regulations in Title 14. Natural Resources Division 1.5. Department of Forestry and Fire Protection Chapter 7. Fire Protection Subchapter 3. Fire Hazard.

Note: Authority cited: Section 4290, Public Resources Code.

1276.02. Maintenance of Defensible Space Measures Disposal of Flammable Vegetation and Fuels.

To ensure continued maintenance of commonly owned properties in conformance with these standards and to assure continued availability, access, and utilization of the defensible space provided by these standards during a wildfire, provisions for annual maintenance shall be provided in emergency access covenants or similar binding agreements.

Disposal, including chipping, burying, burning or removal to a landfill site approved by the local jurisdiction, of flammable vegetation and fuels caused by site development and construction, road and driveway construction, and fuel modification shall be completed prior to completion of road construction or final inspection of a building permit.

Note: Authority cited: Section 4290, Public Resources Code.
1276.03. Disposal of Flammable Vegetation and Fuels Greenbelts.
Disposal, including chipping, burying, burning or removal to a site approved by the local jurisdiction, of flammable vegetation and fuels caused by site development and construction, road and driveway construction, and fuel modification shall be completed prior to completion of road construction or final inspection of a building permit.

Note: Authority cited: Section 4290, Public Resources Code.

1276.04. Greenbelts.
Subdivision and other developments, which propose greenbelts as a part of the development plan, shall locate said greenbelts strategically as a separation between wildland fuels and structures. The locations shall be approved by the local authority having jurisdiction and may be consistent with the CAL FIRE Unit Fire Management Plan or Contract County Fire Plan.

Note: Authority cited: Section 4290, Public Resources Code.
