Eric Hedge
Regulations Program Manager
California Board of Forestry and Fire Protection
P.O. Box 944246
Sacramento, CA 94244-2460

Dear Mr. Hedge,

We received your letter dated September 11, 2019 expressing the Forestry and Fire Protection Board's desire to consolidate and amend regulations related to minimum resource conservation standards throughout the Southern Subdistrict, which includes Marin County. Our understanding is that updating the Board's regulations in this regard will better achieve healthier, more resilient forests that are more capable of adapting to climate change. We have discussed this with staff from Marin County Fire and the Marin County Parks and Open Space Department and received positive comments from both.

Marin County does not object to the regulatory updates proposed by the Board and supports the goals of achieving healthier more resilient forests over the long term. Thank you for the opportunity to comment.

Sincerely,

Jeremy Tejirian
Marin County
