§ 1090.14. NTMP Deviations.

(a) "Minor Deviations" means any change, minor in scope, in a Plan which can reasonably be presumed not to make a significant change in the conduct of Timber Operations and which can reasonably be expected not to significantly adversely affect Timberland productivity or values relating to soil, water quality, watershed, wildlife, fisheries, range and forage, recreation, and aesthetic enjoyment or to result in a violation of the applicable water quality control plan.

(b) All other changes are presumed to be Substantial Deviations which means they could significantly affect the conduct in Timber Operations and potentially could have a significant adverse effect on timber productivity or values relating to soil, water quality, watershed, wildlife, fisheries, range and forage, recreation, and aesthetic enjoyment.

Such actions include, but are not limited to:

1. Change in location of Timber harvesting Operations or enlargement of the area or volume planned to be cut.
2. Change in the Silvicultural Method and Cutting Method on any portion of the Plan area.
3. Change in type or location of logging (Yarding) system or basic type of equipment.
4. Change in location, nature or increase in length of proposed Logging Roads incorporating one or more of the following criteria:

(6) Use of any roads not shown in the Plan which would affect the key habitat of rare or endangered species or other critical wildlife habitat.

(7) Enlargement of Landings where such enlargement was not justified in the original Plan.

(8) Any change of operation in, or designation of, the Watercourse or Lake Protection Zone.

(9) Any downgrading of Watercourse classification.
