**Boggs Mountain**

Calso Camp is Boggs Mountain’s only non-group campground. It has a total of 14 campsites and one shared pit toilet. Historic campground use was moderate with most use on weekends.

The figure below is the pre-Valley Fire campground map from the 2012 brochure.

**Jackson**

Jackson operates 22 general-use campgrounds with 1-17 campsites each, with 64 total campsites. The sites are in two general areas: Camp 1 and Camp 20. The campsites are rustic with most providing a toilet facility but no potable water. Campground usage is high during Memorial Day and summer weekends through the start of school. Most usage occurs on weekends.

A campground map can be viewed below or at the [Jackson Campground Map Link](#):
**Mountain Home**

There are five (5) general-use campgrounds with 8-49 campsites each, with 96 total campsites. Each campground provides vault toilets, potable water, and an RV pad and water hook-up for a camp host. Campground usage is high from Memorial Day through October when temperatures start to fall. Most usage occurs on weekends; it is not unusual for the campgrounds to be at capacity over summer weekends.

**Discussion of Cost Differential for Mountain Home**

Increased costs for campground operation at Mountain Home is primarily tied to the density of the recreation, high occupancy rates of campsites, and maintenance of the potable water system. Frequent maintenance of the toilets, garbage, and facilities is required to maintain the campground to program standards due to the high density of campsites per campground. The high number of user days per campsite due to high occupancy rates has similar impacts to the required maintenance schedule. The potable water system requires opening each season after the snow melt, closing at the end of each season, and water quality monitoring samples periodically through the year. This increased use brings additional revenue, but campsite fees do not cover the cost of operating the camping program. Due to that, the increased use leads to an increased net loss. Charging the proposed $30 per night campsite fee will help minimize the net loss. This will also bring the Mountain Home campsite fee on par with the adjacent Balch Park Campground operated by the County of Tulare. The
additional $5 premium over the proposed fees at Jackson and Boggs is justified by the increased costs discussed above, the potable water system available to campers, and a camp host to enhance the visitor experience.
